Written for Grammar School

By B. S.

All around, this book is half decent. The survey chapters at the beginning were acceptable, if longwinded, and the country profile idea is novel.

However, when used this book is lacking, especially when compared to Principles of Comparative Politics (08) by Clark, William Roberts - Golder, Matt - Golder, Sona Nadeniche [Paperback (2008)] which is the other book that is frequently used in comparative politics classes. After discussing it with my head prof following the semester, he assured me that he would not be using this book again. Even in an intro level class, this book sounds as though it is literally written for a fourth grade audience. Too much of the book's

efforts are devoted to making captivatingly pretty graphs (albeit with shades of blue in this edition, but the newer one uses more colors), but it just fails to connect with students at all, leaving them confused.

Another aspect is that it is simply a dull book. For example, the country profiles are over sixty pages long apiece. Assigning that in a class is guaranteed to produce groans galore, and it lacks a je ne sais quois that is a hallmark of good books but keeps the students flipping the pages.

Not much positive to say about a POLS book anyway, but I did not personally find it to be very helpful or a useful learning tool.
