A great vocabulary book!

By J. Thornton

I purchased this book to use in an intermediate ESL reading/writing class. It contains tons of exercises on the collection of academic words called the Academic Word List. I highly recommend it. This list was put together from the analysis of a corpus of articles from a range of academic topics, and it identifies words that are used in academic English across the board. My students are most interested in these words because they appear frequently in the Reading and Listening passages of the TOEFL IBT and in textbooks they will be reading after they pass the TOEFL.

A good way to teach the AWL

By Frau

I have used Focus on Vocabulary to teach the Academic Word List to advanced ESOL students for several years and found it a wonderful tool for a non-credit Adult Literacy class. The chapters are self-contained, so we just cycle around whenever we get to the end and start again at the beginning. Students can enter at any point and not feel they've missed anything, and it's doable in one academic year if you meet more than once a week. I'm shocked to learn that it's no longer in print; I prefer this one-volume version to the many several-volume alternatives publishers have come out with more recently.
