World Changing

By Marc Solomon

Along with "Frogs into Princes", this book has had the power, and demonstrated it, to change the lives of everyone on the planet. The simple key to communication with the mind, with the intent to change behaviors and emotions is revealed simply as perspective, that is, reframing. It has opened up all paths of possibility of change, even in the face of severe trauma, by leading the suffering or mislead mind into a walk in different shoes.

Appreciated this book.

Not sure about Mr. Bandler as I've seen him on video somewhere and thought he was rather a showman: like he may have been a con artist when he apparently hypnotized this woman. Why? Because it was so hard for me to believe or imagine she could go under that quickly! However, I thought this book a real winner. I will re-read it again (read it quite a few years ago) along with the other book I bought at the time, Transformations by Grinder, which I'll review after I read it again. Got a lot out of both books and now that I'm writing it, am going to read them again. This time I'll read them and take notes. Though I have my doubts about the writer, it shouldn't retract from the value of his books. I am probably no great judge of character so don't let me prejudice you. Just appreciate the messages rather than look closely at the messenger.
